

Dopamine Menu & Task Breakdown Kit

ADHD-friendly · menus, starters, breakdowns & rewards

CalcHub Templates · undated · printable + tablet

How to use your dopamine menu

Healthy dopamine on purpose, instead of endless scrolling

- 1** Fill your menu when you feel OK — not when you are stuck.
- 2** Starters (2-5 min) give a quick lift. Mains (20-60 min) refill you properly.
- 3** Sides pair with boring tasks: music, a podcast, a fidget, a nice drink.
- 4** Desserts are fun but easy to overdo (scrolling, snacks). Set a timer.
- 5** Specials are rare treats: a day trip, a concert, a new hobby class.
- 6** Stuck? Break the task into steps so small they feel silly, then do step 1.
- 7** Not a medical product — it's a practical self-help tool.

My dopamine menu (example)
